

WAL-MART

LOCK

GUIDE

JEWELRY DEPARTMENT

WHAT IS GETTING LOCKED UP?

- **Rings**
- **Necklaces**
- **Earrings**
- **Body Jewelry**
- **Occasionally perfume or handbags/pocket books will be locked up in this department as well.**

SLIDING GLASS SHOWCASES

- Two Screw Plunger lock prevents sliding doors from passing each other.
- Almost always use an “R” bolt.
- If the locksmith requires a “T” bolt, send an “R1” (only if this is being replaced with K2). The new “T” shaped bolts will not fit the old holes.

PLK/K2 40R3PNY (FC LOCK)

PLK/K2 40R1PNY (FB LOCK)

JEWELRY DRAWERS

- Similar to the cabinets and drawers in Electronics.
- Locks are often referred to as “Diamond Back” style.
- Bolt descriptions vary. The spring latches can be known as Slam Locks, auto close, or spring locks.
- It is imperative we know bolt style when taking the order from the locksmith.
- It is possible stores will have straight bolts or cam locks on these cases as well. If we’re replacing like for like on locks, this is acceptable, though not preferred.

DLK/K2(S)3209PNNY (EH LOCK)

JEWELRY DRAWERS

- In addition to the spring bolt drawer locks, some stores may have a Snap Bolt style lock. Often referred to as “the lock with the post.”
- These are uncommon but can cause issues if the locksmiths are not specific enough.

DLK/K2 (M)36PNNY (EB LOCK)

SPINNER CASES

- **Jewelry Spinner cases can be the single most difficult case in Wal-marts to identify.**
- **Not only can the cam size vary, but the lock length and diameter can as well.**
- **This is one of the few cases in Wal-Mart which do not start off with Keymatic. Instead, they have 7 pin locks we refer to as “ETC,” locks. They are premade and all have a code of 2101. If a locksmith gives you this code, there is only one lock that corresponds to it.**
- **Occasionally the spinner cases will have small diameter locks. Often referred to as peanut locks. Keymatic locks are not available in this size and can cause difficulty if the locksmith assumes the locks are the same size. We stock special locks just for this size, referred to as KM1 locks due to their part number.**
- **In addition to varying diameters, the tail pieces can vary as well. Offset, straight and L-Cams can all be used and must be specified by the locksmith. Sending multiple cam tail pieces is always an option and encouraged if the locksmith is unsure.**

SPINNER CASES SIMPLE

- **Jewelry spinner cases are carousel cases which usually have 4 sides to them, each with a flexible Plexiglas door that locks independent of each other.**
- **The locks on these are often simple 4 pin barrel cam locks with an offset cam we know as: ETC Locks and all have the same code across the country.**
- **However, this lock can be replaced with K2 locks if the store requests it in which case the size is usually a 5/8" cam lock. (CLK02)**

CLK302 1203PNYM408 (DA Lock)

JEWELRY SPINNERS ADVANCED

- Occasionally, locksmiths will want anti-rotation plates to prevent the cam locks from spinning. In these situations we send out the 15/16" long cams.

CLK303 1203PNYG106 (DH Lock)

JEWELRY SPINNERS COMPLEX-DIAMETER

- Spinner's might require locks with a smaller diameter than the normal 5/8th". In these situations we send out what is internally known as the KM1.
- They come in 2 variations. KM1 (Which is 3/8th" long) and KM1-5/8 (Which is 5/8th" long)
- These locks do not support our standard cams and would require the cams they come with to be modified to support various shapes or offsets.

In each photo; the lock on the left is the KM1, Middle is the KM1-5/8th and right is the ETC lock.

JEWELRY SPINNERS

COMPLEX: L-CAMS

- L Cam's vary in both length to the bend as well as length from the bend.
- It is sometimes difficult to precisely point out what L cam is needed and often times we will send out multiples to ensure a proper fit.
- If none work, a specially crafted L Cam must be made on a case by case basis.
- All current L Cams are listed below with measurements.

Item Code	Description
CAM-L-FAMOUS	L CAM 1 - 1/8" X 7/16" FA
CAM-L-STYLMARK	L CAM 5/8" X 1/2" STYLMARK
CAM-L-CUSTOM	L CAM 15/16" X 13/16"
CAM-L-SPECIAL	*SPECIAL* L CAM 1 - 0" X 3/8"
CAM-L-WALM-1	*SPECIAL* LENGHT 1-3-16" - BEN
CAM-L-WALM-2	WALMA "L" SPINNER CAM - BARREL
CAM-L-WM-GC	WALMA GUN CASE CAM 2" LONG WIT
